

Next-Gen Threat Intelligence:

Proactive. Interactive. Agentic.

◆ AI Driven ◆ Always On ◆ Always Delivering

Agentic AI is redefining how you fight cybercrime

Security teams are drowning in threat data, but skilled analysts are hard to find, train and retain. KELA's Digital CTI Analysts solve this by giving you 24/7 access to virtual cyber analysts trained on KELA's vast threat intelligence lake and expert methodologies.

From surfacing leaked credentials to profiling adversaries, our digital analysts continuously deliver actionable insights tailored to your environment.

24/7, Always ON!

Continuously monitor threats and deliver intelligence—no breaks, no blind spots

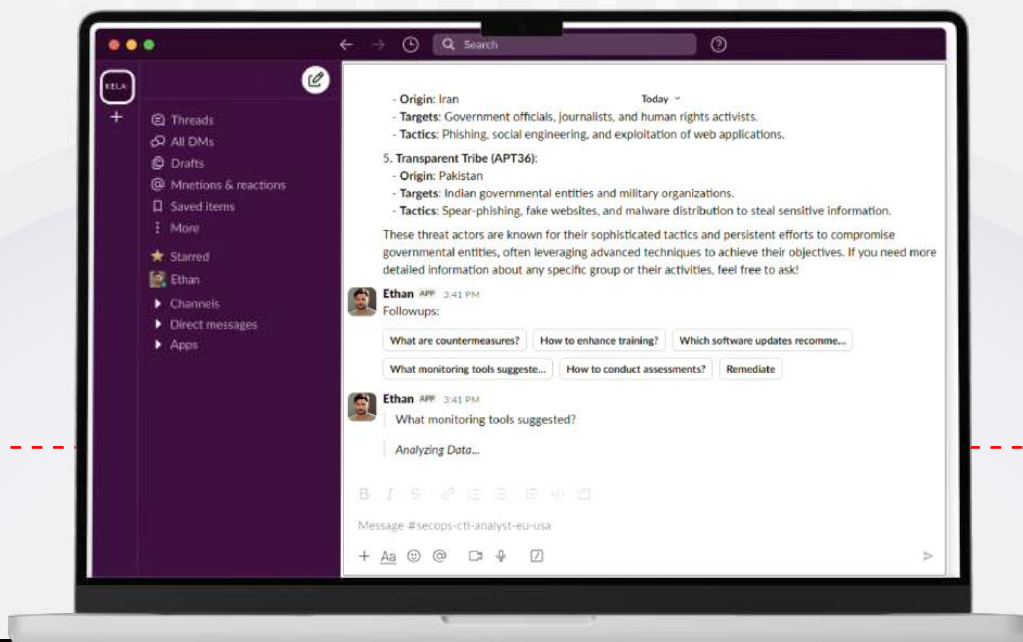

Interactive, Proactive

Ready to engage with your team and proactively surface relevant emerging threats and recommendations

Fully Integrated

Embedded into your tools, workflows, and communications—acting as a true extension of your team

Built for the Analysts You Don't Have, Backed by Intelligence You Can't Get Anywhere Else

Meet Alex

Your AI Digital Cyber Analyst for Enterprise Defense

Alex is a dedicated AI-powered Digital Cyber Analyst designed to support MSSPs and enterprise security teams by working 24/7 to monitor, prioritize, and respond to threats specific to your organization. With access to the intelligence modules you've deployed, your IdP and B2B Intelligence data platforms, Alex delivers only the most relevant, actionable insights—helping you reduce analyst workload, respond faster, and stay ahead of evolving threats. Integrated seamlessly into your existing tools and workflows, Alex enhances your team without expanding your headcount.

Meet Ethan

Your Mission-Ready Digital Cyber Warrior

Ethan is a powerful AI-driven Digital Cyber Analyst built for government agencies and law enforcement teams tasked with defending against the most advanced cyber threats. With full access to KELA's complete intelligence data lake, Ethan can investigate any query—from tactical indicators to complex adversary operations—across the dark web, threat actor networks, and global cyber ecosystems. Ethan delivers real-time, actionable intelligence at scale, helping teams uncover hidden risks, connect the dots faster, and respond decisively—without ever going offline.
