KELA

Stay Ahead of Ransomware with Real Time Identity Protection

Proactive, Real-Time Defense Against The #1 Cause of Cyber Breaches

- Safeguard Employee Identities
- Eliminate Customer Fraud
- Stop targeted attacks

Protect Against Compromised Assets and Identities

Valid account abuse has emerged as the leading initial attack vector used by Cybercriminals, responsible for nearly 50% of cyber attacks. Defending against this threat is straightforward with KELA's Identity Guard. Our solution mitigates the risk of cyber attacks by identifying compromised accounts linked to your organization's digital assets in real-time.

Identify And Act On Impending Cyber Threats

For every incident alert, KELA analyzes and cross checks it vis-a-vis its extensive Intelligence data lake, threat actor TTPs and common cyber threats to determine the impending risk posed to your organization.

A Year in Review

266%
In the past year surge in infostealer-related activity

#1
Abuse of valid accounts and credentials is the top initial access vector for cyber attacks

>50%
of the impact on attacked organizations was due to extortion, data theft, and leaks.

Over
2 Billion
Credentials intercepted by KELA
